

NEW HIGH PERFORMANCE CLIP INSERTING MACHINE

Advantages: Speed, Versatility, Flexibility and Accuracy

Speed

*up to **0,8** second/clip*

Most versatility machine in the market

You want to run another program with different clips? By changing guides, profile-specific puller/clamps, VIBRATOR BOWL and the recipes, our machine allows you to run an almost infinite number of cross sections and CLIPS .

Flexibility

Our machine accepts variation in the geometry of the extrusion, even with a profile that goes from one extreme tolerance to the other.

Accuracy

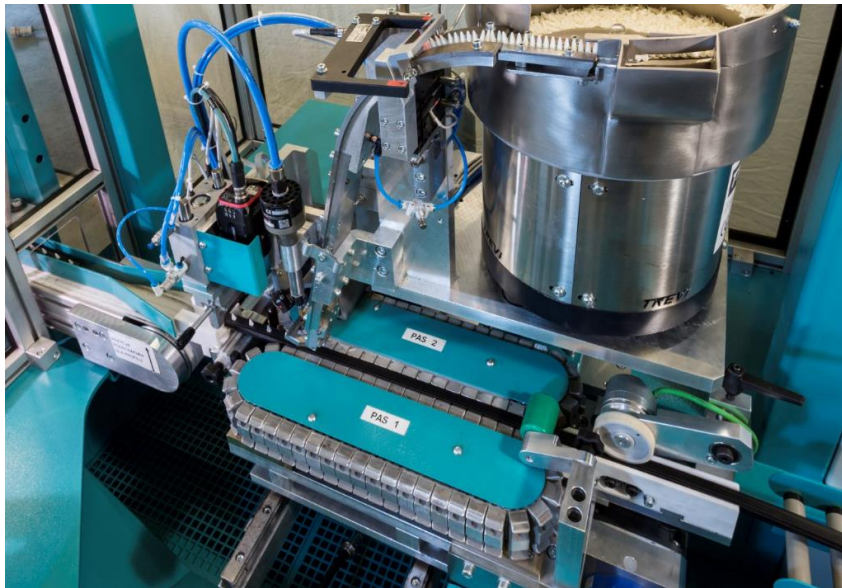

very tight tolerances on clip-to-clip and clip-to-end

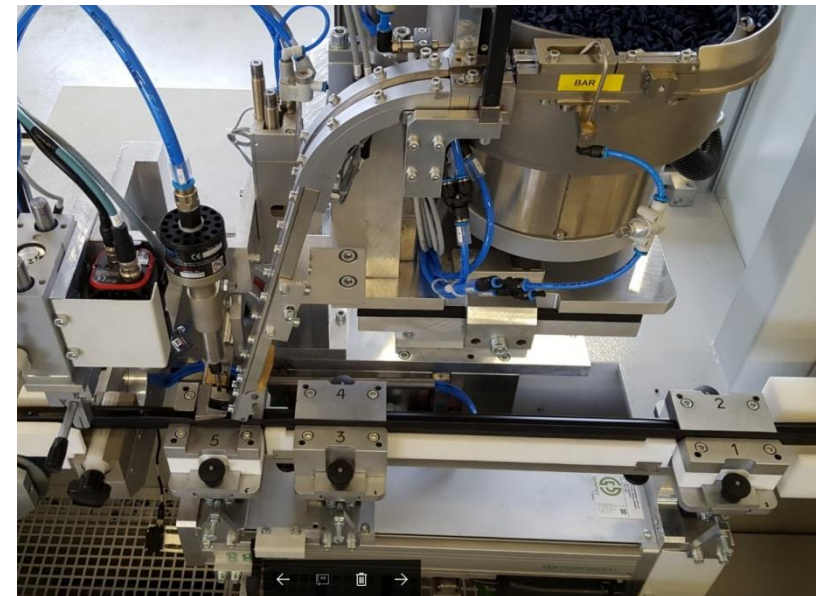

Tecnofive high performance machines, are the most flexible, most permissive, the fastest, most accurate and reliable equipment on the market today.

One machine, available with two different type of profile feeding:

- With shaped belts

- With shaped clamps

Both types of machines allow a fast and easy exchange of the vibrator bowl and allows you to run an almost infinite number of cross sections and CLIPS .
